The Trustworthy Cyber Infrastructure for the Power Grid (TCIPG) team is excited to offer our fourth summer school, to be held June 15-19, 2015! We invite and encourage utility and industry practitioners, researchers, and students to attend and explore the nexus between electrical energy systems and cybersecurity. Our opening reception will be held on June 14, 2015.

Program, Lodging, and Fees
The core program emphasizes basics of security and resiliency for cyber infrastructure in power and smart grids. Advanced topics will address the evolving smarter energy system as well as associated cybersecurity challenges. Sessions will offer integrated training exercises using a virtual smart grid environment developed for this school. The week will also offer networking socials, a job/information fair, and extended lab/learning opportunities.

Summer school will be take place at the Q Center, an executive retreat center in St. Charles, Illinois. Located on a 95-acre wooded property on the Fox River, the Q Center is just a 45-minute drive from Chicago’s O’Hare International Airport. The early registration fee is $1500.

Scholarships
Academic students interested in attending the 2015 TCIPG Summer School have an opportunity to apply for scholarships that cover registration fees, lodging, and a small stipend for travel. Students attending the summer school will also have an opportunity to submit a resume to be distributed at the Job Fair. Applicants must be enrolled in a degree-granting program at a university or college in the United States. Preference will be given to students with demonstrated academic, research, and/or career interests in power or smart grid cybersecurity.

Sponsorship
We offer several sponsorship opportunities for industry, vendor, and utilities that want to increase company recognition among top-tier emerging practitioners and researchers who focus on cybersecurity for power grid. For more information about sponsorships, visit the event website or contact Tim Yardley at yardley@illinois.edu.

The TCIPG summer school complements other research and educational activities at TCIPG, which is funded by the Department of Energy (OE) and Department of Homeland Security (S&T). TCIPG brings together researchers from the University of Illinois at Urbana-Champaign, Arizona State University, Dartmouth College, and Washington State University. For more information about TCIPG, visit [http://tcipg.org](http://tcipg.org).
